PULSECHAIN

Layer 1 Solution for the Future

Why PulseChain?

A revolutionary Layer 1 blockchain that hard-forked Ethereum's complete state, solving scalability through advanced POS consensus.

Technical Edge:

4-second block time

EVM-compatible with native cross-chain capabilities

99.9% lower gas fees vs Ethereum

Zero-loss state copy of all ERC-20s

Tokenomics & Yield :

1 Deflationary mechanism through fee burning

2 Native PLS token with validator staking rewards

3 0% slashing risk for validators

4 Inherited liquidity from forked pairs

DeFi Ecosystem:

1
Fork-preserved AMMs and DEXs

2
Yield farming opportunities across forked protocols

3
Seamless bridge integration

4
Multi-sig security implementation

# Institutional Appeal :

☑ Full EVM compatibility

☑ Audited by CertiK (Score: 92/100, May 2023)

☑ Secondary audit by HashEx (April 2023)

Smart Contract Security by Hacken (June 2023)
